

# ANCHORS ABC

## ABC Model 60 - Conical Anchors

### Features

- Cone shape can resist lateral loadings up to 5KNM.\*
- 60mm Anchors can resist axial loadings up to 120KN.\*
- Specially designed plates allow adjustments to ensure vertical towers, with around 75mm movement in all directions.
- Anchors can be extended up or down to achieve desired installation torque.
- Ideal for road sign bases, wind turbines and small towers.
- Also available is model 90, which can resist 25KNM.

\* Soil and installation dependant.
