equipment

**CUSTOM**  
client specific torque heads

for use with

**ANCHORS**  
ABC

## Features

Whether for use with ground anchors or screw pile foundations, from torque heads to mounting brackets, Autoguide's highly experienced team can quickly design and produce unique units to suit specific customer needs.

**PR** Single speed torque heads incorporate Parker motors with high pressure shaft seals to eliminate the need for a drain line

**PR2** Double speed torque heads use 2 or 4 motors with manual changeover valves to select the torque

**PRV** Variable speed units are used on both large machines and also small machines where access is limited. The variable speed enables smaller machines to install high capacity piles. For example, a 3.5 Tonne mini excavator can produce 25kNm to install 500kN piles

**A** Anchor specific powerheads

Whatever your requirements, from 4,000Nm to 250,000Nm - custom models can range from job specific modifications of existing products to completely new designs.

## Specification

Model Series	PX	PX2	PXU
Maximum Flow	Up to 150 Litres/min	300/600 Litres/min	20/300 Litres/min
Maximum Pressure	300 BAR	300BAR	420BAR

## Innovation

Years of experience designing and manufacturing custom powerheads has put Autoguide at the forefront of torque head build and installation.

## About

Installed on machines reaching from 750kg to 50 tonnes, the range of powerheads are capable of installing piles in ground conditions varying from swamp-like conditions to broken rock.

*- Autoguide torque heads install more screw piles in the UK than all others combined.*

Our in-house repair and calibration service ensures that our products always perform to specification. Units are normally supplied with standard flange output shafts for ease of adaptation for all screw pile connections.

**for a quote or any further information, please call today!**

In common with other manufacturers we reserve the right to modify or change specification without prior notice and without commitments to change units in the field
