ROCK MASTER

percussion torque head

for use with

ANCHORS
ABC

Features

- ▶ *Rotation plus 2 tonne hammer*
- ▶ *Proven over 6 years of commercial use*
- ▶ *As an auger, will drill soil or rock without modification*
- ▶ *Will install Chance Rock Anchors without needing a pilot hole in fissured or fractured rock*
- ▶ *Damping protects the crane/ excavator from vibration fatigue*

A unique combination of rotary drilling and hammer action enables the user to drill holes or screw anchors in a fraction of the time normally taken.

Designed to excel in rocky or exceptionally tough conditions, the Rock Master is capable of drilling a 300mm hole 1 meter deep in granite in 1 hour.

As with all Autoguide Construction equipment, the Rock Master can be custom built to suit specific applications

ROCK MASTER

for use with

Specification

Model	40PRU ROCK MASTER	50PRU ROCK MASTER
Torque	8000Nm@260BAR	12000Nm@275BAR
Control	12 or 24 Volt Electric	12 or 24 Volt Electric
Auger	Special Rock Ripper up to 450mm	Special Rock Ripper up to 450mm
Suitable for Cranes	7-9 Tonne Meter	8-12 Tonne Meter
Suitable for Excavators	6 Tonnes	6-20 Tonnes

About

Installed on machines reaching from 750kg to 50 tonnes, the range of power-heads are capable of installing piles in ground conditions varying from swamp-like conditions to broken rock.

Wherever standard units are not suitable, Autoguide specializes in custom built solutions for all applications.

- Autoguide torque heads install more screw piles in the UK than all others combined.

Our in-house repair and calibration service ensures that our products always perform to specification. Units are normally supplied with standard flange output shafts for ease of adaptation for all screw pile connections.

for a quote or any further information, please call today!

In common with other manufacturers we reserve the right to modify or change specification without prior notice and without commitments to change units in the field
